Carol J. O'Neal, CPPB

Director, Division of Purchasing Services
The County of Kenosha
Kenosha County Administration Building
1010 - 56th Street, 2nd Floor
Kenosha, Wisconsin 53140

Dear Ms. O'Neal,

Aurora Medical Center- Kenosha strongly supports the effort to initiate the Google Application project to build and test an ultra-high speed broadband network in the Kenosha community.

This would be a valuable economic and educational tool for our community, and would provide a great benefit to our healthcare staff in the area of education and networking.

The Kenosha area is a prime location for the Google Application initiative in that it is an area of increasing growth in both business and education. The advances in technology that this effort would bring will enhance the transfer of information between community businesses, such as public safety and healthcare facilities, as well as efficiency and communication for all Kenosha residents.

We appreciate the efforts of the Kenosha County Administration in applying for the Google Application grant for our community. Aurora Medical Center- Kenosha fully supports this initiative and is willing to help in moving forward to bring this opportunity to our area.

Sincerely,

Christine K. Olson
Administrator / Vice President
Aurora Medical Center-Kenosha
